Finally,

- 146. Nepal has made a commendable progress on growth front in the last few years. With the expansion of domestic economic activities, Nepal has an opportunity to reap benefit from the development of emerging neighbouring economies. However, there is still a challenge of maintaining macroeconomic stability while supporting the growth momentum. Rational utilization of loan is to be encouraged by strengthening the financial sector given the slower built up on inflation and balance of payments deficit.
- 147. NRB believes that implementation of this monetary policy, which is in line with the GoN's Fifteenth Plan and the budget for 2019/20, will help achieve macroeconomic and financial stability, enhance financial access, maintain regional balance in financial service delivery and achieve the targeted economic growth.
- 148. NRB would like to thank the various agencies of the GoN, BFIs, various professional organizations, scholars, media and all others for their cooperation in the formulation of this policy. NRB expects continuous cooperation from all the stakeholders in implementing policies and programs as envisioned in this statement.
